

Information Bulletin

Adverse weather conditions in Germany

Heavy snowfall in Germany is currently causing adverse weather conditions. In Offenbach there is around 10cm of snow and it is forecast to continue snowing throughout the day. Snow is expected to continue to fall in the south, Stuttgart and München areas in particular, with rain forecast for the middle and northern parts of Germany. It is forecast that the snowfall will clear up during the course of the day tomorrow but the snow will lead to delays on the roads and cause some disruption to our service.

Please be advised that GKN Freight Services are monitoring the situation and we will do our utmost to minimise any disruption. We will keep you informed of further developments. In the meantime if you have any questions please do not hesitate to contact us.
