Delays at Customs' border points in Turkey

Freight traffic is experiencing lengthy queues along some of Bulgaria's border crossing points into Turkey. Heavy congestion is reported at the border checkpoints for vehicles entering into Turkey and, according to reports, the queue for vehicles trying to get into Bulgaria is equally lengthy. At other border points, longer than normal delays are also being experienced.

The delays are as a result of changes to Customs' procedures coming in to effect from January 1st 2011.

It is anticipated that this situation will be resolved within the week, however, GKN Freight Services will keep you informed of any further developments. In the meantime, if you have any questions please do not hesitate to contact us.
