

GKN Freight Services Information Bulletin

French Fishermen Strike

Please note that the Port of Dover has been closed to all ferry traffic after the ports of Calais, Dunkirk and Boulogne were blockaded due to strike action by French fishermen. This strike action has led to the implementation of Operation Stack on the M20 in Kent to ease jams caused by Dover-bound lorries.

The coastbound M20 has been closed between junction eight for Leeds Castle and junction nine for Ashford West. The carriageway is being used to park lorries before directing them through the Channel tunnel or Dover.

We are doing our best to minimise any disruption to our service and will keep you updated of any further developments. In the meantime please do not hesitate to contact us if you have any queries.
