German Road Toll increase from 1st January 2009

In a recent meeting the German Government voted to implement a mandatory increase in road tolls for Heavy Goods Vehicles with effect from 1st January 2009. The average increase of approximately 17% is half that of the Government's original plan. Whilst this no doubt will affect road freight transport prices within Germany, GKN Freight services is currently in negotiation with its supply base in an endeavour to avoid this increase. Our aim is to minimise any impact upon your business.

If you have any questions please do not hesitate to contact your local GKN Freight Services Office.
