

Information Bulletin

Possible strike action in Basque Country

There are talks of possible strike action by metal workers in the Basque Country, Spain on the 13th, 14th and 15th October. Talks are being held later today, but, if the strike does go ahead, this will mean that many plants in the automotive sector may be closed.

GKN Freight Services are monitoring the situation and liaising directly with relevant customers to ascertain if their plants are affected and/or earlier shipments are possible. GKN Freight Services will inform you of any potential impact on collections/deliveries as soon as this is known. In the meantime, please do not hesitate to contact us if you have any specific concerns.
