

Information Bulletin

Shipments to Port Klang, Malaysia

With effect 1st November 2009 the authorities in Malaysia will require a 6 digit HS code to be manifested for all import shipments to the North Port terminals in Port Klang. This supplements the existing requirements for transshipments.

Any import shipment without this HS code will be registered as an "unknown commodity", be subjected to additional checks, and may incur penalties.

Customers are therefore kindly requested to supply the relevant HS code(s) at the time of booking or SI submission. The required data must be available 48 hrs prior to vessel arrival in Port Klang and does not affect other ports in Malaysia.

Please contact your local GKN Freight Services office if you require further information.
