

Information Bulletin

Situation Nhava Sheva

Over the last 2 months, there have been a string of delays at Nhava Sheva. This situation started with the collision of MSC Chitra and MV Khalija early August and continued with the channel being closed causing severe delays, vessel schedules being affected and some vessels even skipping their calls to Nhava Sheva. We had hoped this situation would have improved over the last couple of weeks and things would come back to normal, however, problems are persisting.

Please rest assured that GKN Freight Services are monitoring the situation and will keep you informed of any further developments. In the meantime, if you have any queries please do not hesitate to contact us.
