Volcanic Ash Causes More Delays

The return of the volcanic ash cloud from Iceland during Sunday night has caused some airport closures, primarily in the UK and Ireland and Netherlands.

Both London Heathrow and Gatwick were closed but reopened at 0700 GMT. However both airports are operating with restrictions, which have caused flight delays. In Ireland Dublin was closed, as was Amsterdam in the Netherlands.

The situation remains uncertain with the potential for further delays to cargo flights.

GKN Freight Services are carefully monitoring the situation and are liaising with those customers directly affected by this situation. However, please do not hesitate to contact us if you have any questions.
